

Thomas Joseph Broadbent

Also, the correct city for Kendyl Roman was Sunnyvale, CA. The Cupertino, CA, address was a work location.

**IN THE CLAIMS:**

Please cancel claims 28 through 31 in accordance with the enclosed response the restriction requirement.

Please add new claims 32 through 36 as follows. The addition to these claims is not being made to overcome any prior art rejections.

32. The system of claim 23, said system further comprising:

H<sup>1</sup>  
cont

d. a robotic device coupled to said transmitter,  
wherein said transmitter is configured to control said robotic device, and  
wherein said transmitter is configured to receive control commands from said user, and  
wherein at least one of said video images comprises a substantially live video,  
whereby said remote receiver receives and displays said live video substantially in real time,  
and  
whereby the remote user can control said robotic device with control commands while  
viewing said live video.

33. A system for transmitting a video over a network, said system comprising:

a. a transmitter containing one or more digitized frames of a video being transmitted,  
b. a network connected to said transmitter,  
c. one or more remote receivers connected to said network for receiving said video from said transmitter,  
wherein at least one of said receivers is configured to receive one or more control commands from a user, and  
wherein said transmitter is configured to receive at least one of said control commands from said one of said receivers,

wherein said control command changes the operation of said transmitter,  
whereby said user can remotely control the operation of said transmitter.

34. A system of claim 33 wherein said control command specifies a subset of the area of said digitized frames,  
wherein said transmitter selectively operates on said subset of the frame area.

35. A system of claim 33 wherein transmitter further comprises a plurality of video compressors  
and,  
wherein said control command allows the remote user to select or change the selection of one  
of the plurality of video compressors to be used by the transmitter to process said digitized  
frames.

36. A system of claim 33 wherein said control command allows the remote user to start or stop  
the transmission of said video.
